This total is almost 58% positioning

- 1 Exposure Levels in the GMU are a guideline for overall portfolio exposure range based on market conditions week to week
- 2 Focus List is “basket of trade ideas” for traders to choose from based on their risk tolerance, timeframe and goals. Focus List is **not a copy cat portfolio**. Taking all FL Trade Ideas would result in too much exposure for market conditions. Focus List ideas are valid for the one week only unless otherwise noted.

Note: All Focus List Trades that do trigger are tracked by RKI till the trade either Stops Out or achieves the Target Sell Price

Sample Focus List of Trade Idea

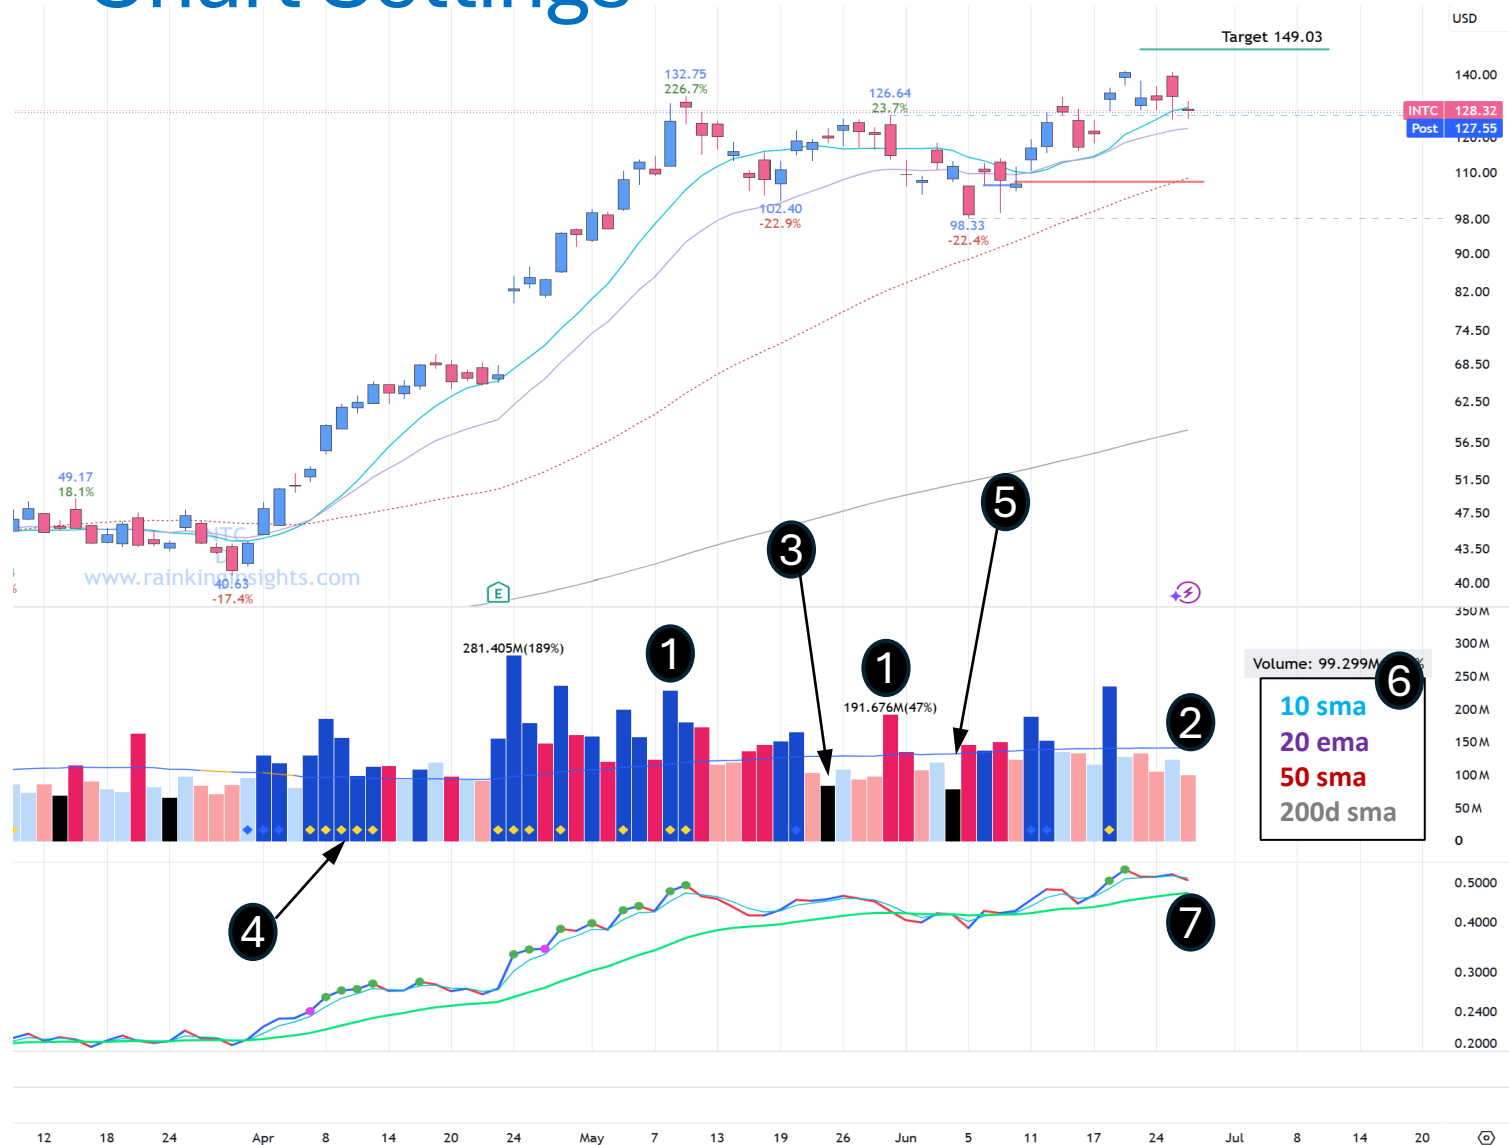

- 1 Chart Analysis
- 2 Trade Setup
- 3 Buy Point; Position Size
- 4 Stop Loss Placement
- 5 Target Exit Price
